

Our New Range of Doors

In Our Eco Essence Range – FTD EE7

Colour : Crema

Colour : Verdi

Colour : Bouchon

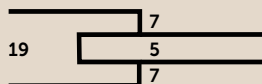

Colour : Black Gold

Colour : Bleached Oak

Colour : Illawarra

Eco Essence FTD EE7 – is part of our new range of doors manufactured in reconstituted veneer – beautiful, versatile and environmentally friendly.

Unlike natural timber veneers, recon veneers are free from imperfections such as knots, splits and holes – providing a consistent colour, pattern and grain.

You have the flexibility to choose from a wide selection of veneer colours, allowing for a perfect match to your home's architectural style.

All doors are supplied in their raw state unless you specify a polished finish. This allows you to choose the right level of shine and character for your doors, ensuring they fit seamlessly into your home.

Contact our office for further information.

Available in a wide range of premium reconstituted veneer colours:

Also available in our standard timber veneer range, common species include: Tasmanian Oak, American Oak, Blackwood, NFG Messmate & European Oak.

Introducing

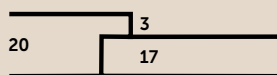

Our Brand New Eco Essence Door Profile – FTD EE23

Colour: Bouchon

Colour: Corsican Walnut

As Shown: Mitred Join

Say hello to FTD EE23 – the newest addition to our Eco Essence range.

This profile features the same sleek design as our classic FTD23, but is made entirely from reconstituted veneer – just like our popular FTD EE7. With slimline stiles and rails and your choice of square or mitred join finish, the FTD EE23 delivers the modern shaker look with a more sustainable approach.

Why choose Eco Essence?

Crafted using sustainably sourced, PEFC & FSC certified timber fibres, our reconstituted veneers provide a consistent grain, free from knots, splits or imperfections – delivering a flawless finish every time.
